WE ROLL.**

MEESE. INNOVATION AND SAFETY FROM DAY ONE.

Meese has been delivering superior rotomolded solutions for the laundry, healthcare and hospitality industries for more than 50 years. As a market leader, we understand the changing needs and daily challenges our wide variety of customers face every day.

Meese has always been at the forefront of product innovation and design.

- Implemented the first plastic laundry carts in the early 1970s
- Created the popular and often-copied 72P followed by an entire line of Poly-Trux products to meet a wide variety of customer needs
- With a focus on consistent high quality to meet customer need, invested in multiple rotomolding facilities across the country utilizing the most advanced rotomolding technology
- Developed and introduced ergonomically-beneficial products to support the long term safety of all customers and end users (Meese ERGO)
- Constantly working to innovate, introduced the first ever antimicrobial Poly-Trux to make the best material handling products even better (Meese Silva-Trux)
- Introduced accessories to support customer needs in all environments including rotomolded lockable lids and doors, premium casters, lightweight and easy to convert poly shelves, and a variety of high end graphic options that can be integrated into the poly to meet any branding needs
- Designed all products with a metal free interior to ensure customer products are protected from rust stains as well as potential snags and tears
- Implemented innovative High Density Polyethylene (HDPE) to make carts lighter and stronger

72P. DURABLE. RELIABLE. UNBEATABLE.

The 72P Poly-Trux,[®] designed and trademarked by Meese in 1972, has long been the industry standard for tough, safe and dependable laundry carts. As the preferred cart in the laundry industry, it directly addresses the needs of the laundry customer.

And now there's more reason than ever to make sure your cart is a Meese 72P. We made the best even better by innovating our carts with new ground-breaking technology and design elements.

The 72 ERGO provides important ergonomic benefits including a coiled spring platform built into the cart itself to help ensure the safety of your team members by making repetitive loading and unloading easier and faster.

The 72P Silva-Trux is our antimicrobial solution, created to protect carts from deterioration caused by mold and mildew.

All iterations of the 72P are always built with High Density Polyethylene (HDPE) to make them rugged and lightweight. The base and body are designed to prevent any bending or bowing and the optional lid and door are also rotomolded and have been developed to withstand all the rough and tumble work of laundry transportation. The casters are simply the best in the industry and fully backed by warranty.

Meese continues to be dedicated to supporting their customers with the evolution of the original 72P. The 72 Ergo, 72L, 72 Biohazard, 72S and 72 Silva-Trux the were designed to optimize their customers' workplace to ensure success now and in the future.

Made of High Density Polyethylene (HDPE) compared to Linear Low Density Polyethylene (LLDPE), common with many competitors

Hand holes

Ergonomic front cutout

Torque-resistant, molded-in inserts mean no rust in the interior of the cart

Heavy-duty powder-coated steel base

Four 6" x 2," gray, rubber, non-marking casters

Optimally placed drain holes

MEESE ERGO PRODUCTS ELEVATE LAUNDRY AND PRODUCTIVITY.

Meese is dedicated to creating innovative products that keep your workplace safe and productive. With unique ergonomic features, many Meese products help employees stay safe while on the job. For example, our Spring-Loaded Ironer Feed Carts are ergonomically-designed with a coiled spring platform that quickly and conveniently moves laundry up into the hands of your team members. This prevents back strain that typically results in injuries and significantly decreased productivity.

The 72 ERGO and the 72L are also equipped with a special cutaway design to help make repetitive loading and unloading of linens easier than ever. This helps increase productivity while minimizing missed work days and potential workman's compensation claims.

And all Meese ERGO products are rotationally molded and chemical-resistant and made with high-density, lightweight polyethylene (HDPE) which means they are waterproof, rugged and dependable.

Ergonomic spring platform offers less bending and safer operations.

The rising platform enables faster loading and unloading without straining team members' backs.

Easy rolling casters help lighten the load for your team members.

Optional caster brakes and swivel locks keep carts safely in place.

THE CLEANEST LAUNDRY DEMANDS THE CLEANEST RIDE. INTRODUCING SILVA-TRUX, THE WORLD'S FIRST ANTIMICROBIAL POLY-TRUX.

Meese Silva-Trux are the first and only proven antimicrobial Poly-Trux on the market. The Meese Silva-Trux line offers an enhanced layer of protection to stop microbial growth. This technology was added to five of the most popular Meese carts: the 70P Silva-Trux, the 72P Silva-Trux, the 90P Silva-Trux, the 92P and the 101P Silva-Trux.

Meese Silva-Trux are infused by an antimicrobial agent that protects the carts from deterioration caused by mold and mildew. The infusion also helps Silva-Trux guard against odors and stains from microbial growth.

Silva-Trux does not protect users or others against disease causing bacteria. Always clean this product thoroughly after each use.

BULK-TRUX

70P POLY-TRUX®

Overview: This rugged cart is the first in the Poly-Trux® line of carts made in 1970. The 70P led the way for laundry carts of the future but remains a mainstay in the industry today. The 70P has the same body type as the 72P but is slightly shorter, making it preferred by some customers dealing with space constraints.

Dimensions 48" L x 28½" W x 54½" H / Inside Depth: 47"
Capacity 29 Bushels/36 cubic feet
Load Capacity 800 lbs.
Shipping Weight 126 lbs. for standard part only
NOTE: 70 fits 60 per std. trailer; 70 with lid and door fits 42 per std. trailer

72P POLY-TRUX®

Overview: This often-imitated Poly-Trux® bulk cart is the standard by which all other carts are judged. In the 70's, Meese designed and trademarked the Poly-Trux® line of carts, starting with the 70P, to directly meet the needs of their laundry customers. Meese then went and made the best even better by introducing the 72P, a taller version of the 70P built with the same strength and functionality of the original, but designed to maximize even more space. Although many companies claim to offer the 72P, Meese is the only company that offers the true original.

Dimensions 48" L x 28½" W x 68½" H
Inside Depth: 59"
Capacity 38 Bushels/48 cubic feet
Load Capacity 800 lbs.
Shipping Weight 140 lbs. for standard part only
NOTE: 72 fits 60 per std. trailer

72S POLY-TRUX®

Overview: The 72S, an upgraded version of the classic 72P, has superior strength, durability and security yet a sophisticated and contemporary design. The 72S is designed for customers that need a more modern and sophisticated look to their cart especially in public facing locations such as high-end hotels, resorts, health clubs, and restaurants. The brand-conscious 72S customer can even opt to have their logo molded-onto or molded-into the cart. Its ergonomic cutaway design helps speed loading and unloading and like all Meese carts, has a metal free interior

to avoid snags and tears. The 72S has an optional lockable lid and door to deter theft and secure goods during transport and storage.

Dimensions 48" L x 28½" W x 66½" H - Inside Depth: 59"
Capacity 38 Bushels/48 cubic feet
Load Capacity 1000 lbs.
Shipping Weight 115 lbs. for standard part only
NOTE: 72S fits 60 per std. trailer; 72S with lid and door fits 42 per std. trailer

71P POLY-TRUX®

Overview: The 71P has the same classic construction as the Meese flagship 72P but it is a narrower and taller sized cart. The 71P is made for optimum usage in tight spaces like elevators and older buildings.

Dimensions 40" L x 26" W x 75½" H / Inside Depth: 68"
Capacity 32 Bushels/39 cubic feet
Load Capacity 600 lbs.
Shipping Weight 142 lbs. for standard part only
NOTE: 71P fits 70 per high bay trailer

73P POLY-TRUX®

Overview: This cart is the same narrow size as the 71P although slightly shorter (3") for use in even tighter spaces with a slightly different design. The 73P differs from the 71P due to its deep V-shaped cutout in the front. This more ergonomic functionality means easier loading and unloading.

Dimensions 41" L x 28½" W x 72" O.A.H. - Inside Depth: 64"
Capacity 34 Bushels/42 cubic feet
Load Capacity 800 lbs.
Shipping Weight 140 lbs. for standard part only
NOTE: 73P (3) trucks side by side in standard trailers (45) upright + (16) more stacked on top, a total of (61) per trailer.

74P POLY-TRUX®

Overview: This rugged cart has the same great quality and characteristics of the 70P but is slightly taller and narrower. This nimble cart is a popular choice in lower volume laundries and small hotel laundries dealing with tight spaces. The 74P is built with rugged construction, a reinforced base, and high quality casters.

Dimensions 41" L x 28½" W x 59" O.A.H
H - Inside Depth: 51"
Load Capacity 800 lbs.
Shipping Weight 122 lbs. for standard part only
NOTE: Standard (2) Trucks side-by-side in standard trailers trailers (42) upright + (18) more stacked on top. A total of (60) per trailer.

70P BIOHAZARD POLY-TRUX®

Overview: The 70P Biohazard Poly-Trux has the same rugged body construction, reinforced base and high quality casters as the 70P with the added benefit of the Biohazard feature uniquely created for use in hospitals, medical clinics and other places where biohazardous waste is a threat The 70P Biohazard has the same body type as the 72P but is slightly shorter, making it preferred by some customers dealing with size constraints. The 70P Biohazard creates a necessary barrier between soiled linens and human contact. It features special designated hinged "Biohazard" placards riveted in recesses of the cart on both front and back to ensure they don't get snagged or

accidentally pulled off. The placard flips down to signify the cart is clean and flips up to indicate biohazard material is in the cart. The cart is easily identified in Biohazard red or orange. The 70P Biohazard has an optional rotomolded lockable lid and door to deter theft and secure goods during transport and storage.

Dimensions 48" L x 28½" W x 54½" H / Inside Depth: 47"
Capacity 29 Bushels/36 cubic feet
Load Capacity 800 lbs.
Shipping Weight 126 lbs. for standard part only
NOTE: 70P fits 60 per std. trailer; 70P Biohazard with lid and door

72P BIOHAZARD POLY-TRUX®

Overview: The 72P Biohazard has the same rugged construction as the 72P, with its reinforced base, and high quality casters. But the 72P Biohazard is uniquely created for use in hospitals, medical clinics and other places where biohazardous waste is a threat. The 72P Biohazard features special designated hinged "Biohazard" placards riveted in recesses of the cart on both front and back to ensure they don't get snagged or accidentally pulled off. The placard flips down to signify the cart is clean and flips up to indicate biohazard material is in the cart. The cart is easily identified

in Biohazard red or orange. The 72P Biohazard has an optional rotomolded lockable lid and door to deter theft and secure goods during transport and storage.

Dimensions 48" L x 28½" W x 68½" H / Inside Depth: 59"
Capacity 38 Bushels/48 cubic feet
Load Capacity 800 lbs.
Shipping Weight 140 lbs. for standard part only
NOTE: 72P fits 60 per standard trailer. 72P Biohazard with lid and door fits 42 per standard trailer. A total of (60) per trailer.

ERGONOMIC PRODUCTS

72 ERGO POLY-TRUX®

Overview: Meese developed the 72 ERGO with ergonomics and safety in mind to make it easier for your team members to load and unload loose linens, laundry bags and other goods. The 72 ERGO elevates it's spring loaded platform to a comfortable working height, which reduces repetitive bending and reaching into the cart, and shortens the distance goods need to be lifted. It dramatically minimizes the potential for injuries and workers' compensation claims.

Dimensions 48" L x 28½" W x 65" H / Inside Depth: 58"
Capacity 29 Bushels/35 cubic feet
Load Capacity 800 lbs.
Shipping Weight 148 lbs. for standard part only
NOTE: 72 ERGO fits 60 per std. trailer; 72 ERGO with lid and door fits 42 per std. trailer

28P16 ERGO UTILITY-TRUX

Overview: This ergonomic and worker-friendly feed cart was designed to fit comfortably underneath the ironer feed board for easy access to linen. The 28P16 is slightly longer and narrower than the 28P18 to accommodate wider ironers and remain conveniently placed under the feed board. The coil spring platform rises as items are removed, making it easier for team members to access linen. This promotes productivity and

wellness by reducing the potential for physical strain when processing flatwork.

Dimensions 59½" L x 20½" W x 31½" H
Capacity 16 Bushels
Load Capacity 500 lbs.
Shipping Weight 108 lbs. for standard part with spring platform only

28P18 ERGO UTILITY-TRUX

Overview: This ergonomic and worker-friendly feed cart was designed to fit comfortably underneath the ironer feed board for easy access to linen. The 28P18 is wider than the 28P16 with slightly different dimensions. The coil spring platform rises as items are removed, making it easier for team members to access linen. This promotes productivity and wellness by reducing the potential for physical strain when processing flatwork.

Dimensions 56" L x 24" W x 31" H
Capacity 16 Bushels
Load Capacity 500 lbs.
Shipping Weight 130 lbs. for standard part with spring platform only

25P24 ERGO UTILITY-TRUX

Overview: The 25P24 is an ergonomically-designed, worker-friendly, all-use spring platform cart. The spring-loaded platform rises as items are removed, improving productivity by reducing the need for bending and lifting when processing linens in a laundry setting, sorting recyclable materials in an e-scrap setting, or handling products in a distribution center.

Dimensions 66½" L x 35" W x 31" H
Load Capacity Spring platform fully compresses at 136 lbs. (34 lbs per spring)
Shipping Weight 146 lbs. for standard part with platform only

25P30 ERGO UTILITY-TRUX

Overview: The 25P30 is an ergonomically designed, worker-friendly, multi-use coil spring platform cart. It is slightly taller than the 25P24. The spring-loaded platform rises as items are removed, improving productivity by reducing the need for bending and lifting when processing linens in a laundry setting, sorting recyclable materials in an e-scrap setting, or handling products in a distribution center.

Dimensions 66" L x 35" W x 38" H
Load Capacity Spring platform fully compresses at 136 lbs (34 lbs per spring)
Shipping Weight 176 lbs. for standard part with platform only

72L ERGO POLY-TRUX®

Overview: This cart has all the great features of a 72P with some ergonomic features that greatly improve its ease of use. The lower, wider cutout opening in the cart makes for easier access to all items inside. The 72L is made of chemical resistant, waterproof polyethylene and comes with a powder coated steel base and industrial strength casters.

Dimensions 48" L x 28½" W x 66½"H - Inside Depth: 59"
Capacity 38 Bushels/48 cubic feet
Load Capacity 800 lbs.
Shipping Weight 140 lbs. for standard part only
NOTE: 72L Standard (2) trucks side by side in standard trailers (42) upright + (18) more stacked on top. A total of (60) per trailer.

INDUSTRIAL SORTING TABLE ERGO

Overview: This heavy duty, durable and versatile sorting table is meant to handle anything from sorting e-scrap components to 200 pound slings dropped from a ceiling in a laundry. The sorting table's unique sorting functionality makes it perfect for any sorting task. Commonly used in laundry, recycling and materials handling, it has heavy duty roto-molded legs to allow it to handle significant impact without stopping production. Optional leg braces are available for extra support for really heavy duty jobs.

Dimensions 97" L x 47" W x 36 ½" H - Working Height: 30"
Capacity 54 cubic feet of volume below front opening
Load Capacity 400 lbs.
Shipping Weight 105 lbs. for standard part only

54P40 ERGO UTILITY-TRUX

Overview: These durable Utility-Trux are large, rugged and efficient carts designed for a number of applications in various industries including laundry, material handling, e-scrap and ecommerce fulfillment. Their waterproof, rugged, low-center-of-gravity body and industrial strength swivel casters make the 54P40 Utility-Trux easy to roll, easy to maneuver and able to withstand heavy loads. The ribs and solid rim across the top of all four walls provides added strength to these nestable Utility-Trux.

Dimensions 76" L x 40½" W x 32" H
Capacity 32 Bushels
Load Capacity 1200 lbs.

Great for linen drops from either slings or dryers, these units are designed to take a beating while also being a safe and ergonomic in-plant option. As an added ergonomic option, the 54P40E features a lower cut out in one of the walls to provide better accessibility for team members.

SHAME THEY
DON'T COME
WITH ODOMETERS!

SHELF-TRUX

90P SHELF-TRUX®

Overview: The 90P is a rugged, versatile, popular, often-imitated shelf truck preferred by many hospitals and healthcare clinics around the country due to its practicality, strength and durability. The original “Roundtripper,”the 90P started a movement with convertible shelf carts. The 90P comes standard with removable wire shelves perfect for delivering folded goods, cleanly and efficiently. When empty, these shelves can be converted to the soiled position to form a “wall,”making the transportation of soiled linens cleaner and easier within the hospital setting.

92P SHELF-TRUX®

Overview: The 92P, similar to but slightly taller than the 90P, is a popular, often-imitated shelf truck preferred by many hospitals and healthcare clinics around the country. The 92P comes with removable wire shelves. When full, this “Roundtripper”cart is perfect for delivering folded goods, cleanly and efficiently. When empty, these wire shelves can be converted to the soiled position to form a “wall,”making the transportation of soiled linens cleaner, safer, and easier.

87P SHELF-TRUX®

Overview: The 87P is a popular shelf truck often found in hospitals and healthcare facilities around the country for the transportation of clean and soiled linen. The 87P offers a convenient and more organized solution to the daily challenge of delivering linens from cart to floor. This unique cart comes standard with two removable convertible wire shelves, but was designed to have room for an optional third shelf.

88P SHELF-TRUX®

Overview: This strong yet lightweight shelf truck is very similar in features to the 87P, only in a narrower body style. The 88P offers a convenient, and more organized solution to the daily challenge of delivering linens from cart to floor. It comes with removable wire shelves that are easily converted from the clean to soil position and back. The 88P is thinner than the 87P and, therefore, preferred by many customers that need their carts to fit into narrow spaces during the transportation of linens from cart to shelf.

84P SHELF-TRUX®

Overview: The 84P is a longer version of the 90P, often found in hospitals and healthcare facilities around the country for the transportation of clean and soiled linen. The 84P offers a convenient and more organized solution to the daily challenge of delivering linens from cart to floor. It comes with removable wire shelves that are easily converted from the clean to soil position and back.

101P SHELF-TRUX®

Overview: The rugged 101P is a smart, practical, long-lasting choice in shelf trucks due to its efficient size, strong construction and break-through shelf design feature. The non-removable, hinged, shelf system enables shelves to be repositioned quickly for use in delivery and return of linens. And, since the shelves stay in the carts, there is no chance for them to get lost. The all-poly shelves (in colonial white as standard) are easy to clean and, as a result, help maintain optimum sanitary conditions.

102P SHELF-TRUX®

Overview: The rugged 102P is a smart, practical, long-lasting choice in shelf trucks due to its efficient size, strong construction and break-through shelf design feature. The non-removable, hinged, shelf system enables shelves to be repositioned quickly for use in delivery and return of linens. And, since shelves stay in the carts, there is no chance for them to get lost. The all-poly shelves (in colonial white as standard) are easy to clean and, as a result, help maintain optimum sanitary conditions.

103P SHELF-TRUX®

Overview: The rugged 103P is a smart, practical, long-lasting choice in shelf trucks due to its efficient size, strong construction and break-through shelf design feature. The non-removable, hinged, all-polyethylene shelf system enables shelves to be repositioned quickly for use in delivery and return of linens. And, since shelves stay in the carts there is no chance for them to get lost. The all-poly shelves (in colonial white as standard) are easy to clean and, as a result, help maintain optimum sanitary conditions

100P SHELF-TRUX®

Overview: The rugged, versatile 100P is a solid, heavy duty, long-lasting shelf truck designed to operate under even the toughest conditions in a variety of situations. The 100P comes standard with easy-to-clean, ventilated all-poly shelves that are quickly and easily converted from the clean position to the soil position and back with barely any effort. The wall thickness, wraparound steel rim support, and industrial grade casters make this cart extra durable and able to handle large, daily loads with ease.

95P SHELF-TRUX®

Overview: The rugged 95P Poly-Trux is the premier, extra-large bulk truck that offers the ultimate in delivery volume. This bulk truck is designed for maximum loading situations, most often in the hospital setting. It comes standard with two removable convertible wire shelves.

90PL SHELF-TRUX®

Overview: The 90PL bulk laundry cart is a rugged, versatile, popular, shelf truck with the added benefit of doors, a solid lid, and a built in security lock. It is preferred by many hospitals and healthcare clinics around the country due to its practicality, strength, durability and security. The 90PL comes with two, non-removable, ventilated polyethylene shelves and a solid, closed top. The 90PL's lockable doors act as an important barrier from the elements and extra security. Both doors are attached by a molded-in door reinforcing bar, opening flush to the side of

90PSL SHELF-TRUX®

Overview: The 90PSL is a smooth, sleek, versatile, lockable, round-tripper shelf truck, perfect for both clean linen delivery and soiled linen pick up and return. It is a favorite in hospitals, healthcare clinics and luxury properties around the world. The 90PSL comes with two removable and repositionable ventilated polyethylene shelves, a split hinged lid for ergonomic access and lockable doors to deter theft and protect from the elements. When full, this cart is perfect for delivering folded goods, cleanly and efficiently. When empty, these shelves can

the cart, enhancing usability and the accessibility of the cart's contents while the built in security lock deters access.

P319 UTILITY-TRUX

Overview: These Utility-Trux are traditionally popular in the Northeast, but are now growing to be a standard at laundry facilities across the country. The unique body style of these Utility-Trux allow them to be a multifunctional cart for the collection and sorting of linen. The P319 is ideal for sorting out torn, stained or generally unusable linen.

24P24 UTILITY-TRUX®

Overview: This single rib rugged cart is found primarily in laundries, designed to handle heavy wet loads of linen. The 24P24 offers easy handling, loading and unloading of bulky items and has a rolled top for easier handling and transportation. They also nest 6 high and stack for efficient storage and transport.

54P16 UTILITY-TRUX®

Overview: This larger Utility-Trux option is a popular unit when it comes to efficiently and effectively moving items around within a facility. They are commonly used in the laundry industry, particularly by uniform companies and in cleanroom applications. Their waterproof, rugged, low-center-of-gravity body and industrial strength swivel casters make the 54P16 easy to roll, easy to maneuver and able to withstand heavy loads.

54P18 UTILITY-TRUX®

Overview: This larger Utility-Trux option is a popular unit when it comes to efficiently and effectively moving items around within a facility. They are commonly used in the laundry industry, particularly by uniform companies and in cleanroom applications. Their waterproof, rugged, low-center-of-gravity body and industrial strength swivel casters make the 54P18 easy to roll, easy to maneuver and able to withstand heavy loads.

54P26 UTILITY-TRUX®

Overview: This larger Utility-Trux option is a popular unit when it comes to efficiently and effectively moving items around within a facility. Their waterproof, rugged, low-center-of-gravity body and industrial strength swivel casters make the 54P26 easy to roll, easy to maneuver and able to withstand heavy loads. The ribs and solid rim across the top of all four walls provides added strength to these Utility-Trux.

54P40 ERGO UTILITY-TRUX

Overview: These durable Utility-Trux are large, rugged and efficient carts designed for a number of applications in various industries including laundry, material handling, e-scrap and ecommerce fulfillment. Their waterproof, rugged, low-center-of-gravity body and industrial strength swivel casters make the 54P40 Utility-Trux easy to roll, easy to maneuver and able to withstand heavy loads. The ribs and solid rim across the top of all four walls provides added strength to these nestable Utility-Trux. Great for linen drops from either slings or dryers, these units are

They have been, and continue to be, an integral part of janitorial, recycling and waste management efforts all around the world for transporting heavy loads. The One Yard Tilt-Trux have steel support framing, metal free interior and use industrial-strength wheels and casters to handle up to 850 pounds of trash, construction and demolition

1-1/2 YARD TILT-TRUX®

Overview: These heavy-duty, industrial strength, extra-durable, rotomolded Tilt-Trux are also environmentally friendly and made of 70% “post consumer” recycled material. They have been, and continue to be, an integral part of janitorial, recycling and waste management efforts all around the world for transporting heavy loads. The One and A Half Yard Tilt-Trux have steel support framing, metal free interior and use industrial-strength wheels and casters to handle up to 1200 pounds of

The entire 39 Series of Utility-Trux (39-6, 39-8, 39-12, 39-14, 39-16, 39-18, 39-20) can be fitted with a hanging spring-loaded platform that rises as goods are removed to keep work positioned at the right height and reduce bending and reaching. The spring platform encases smooth, waterproof vinyl around a rigid, plywood platform to handle a variety of products. All 39 Series Utility-Trux nest when empty for space-saving storage and transport.

weather conditions. Their 10-inch rubber wheels with 4-inch rubber swivel casters make these easy to maneuver over almost any terrain. **Optional Tilt-Trux Lids also available for each size.**

BULK CONTAINERS

P333 BULK CONTAINER

Overview: This rugged, durable bulk container made of High Density Polyethylene (HDPE) has features that contribute to easy lifting and storing and is taller than the P291. Built with two-way fork access to make lifting easier and safer, the P333 is also nestable for better shipping, handling and storage when empty. All P333’s come standard with a rotomolded lid, allowing them

to be easily stacked when full. The smooth poly interior ensures complete emptying every time.

Dimensions Top, Outside: 45”x 45” Footprint: 44”x 44”
Overall Height: 44¼” covered
Capacity 35 cubic feet
Load Capacity 800 lbs.
Shipping Weight 120 lbs. for standard part only

P433 BULK CONTAINER

Overview: This rugged, durable bulk container, similar to the P333, is made of High Density Polyethylene (HDPE) and has unique loading and unloading features for even greater ease of use. Built with forklift slots on all 4 sides, forklift drivers can locate access points quickly from any side without using their forks to rotate the container, potentially causing damage. Also, team members no longer need to think about how to position

the container when loading or stacking. They stack 2 high filled and covered and nest when empty without jamming together.

Dimensions Top, Outside: 47½”x 47½” Footprint: 44”x 44”
Overall Height: 40¼” covered
Capacity 35 cubic feet
Load Capacity 1200 lbs.
Shipping Weight 112 lbs. for standard part only Part(s) 1-2 3-5 Freight Class 250 150

P291 BULK CONTAINER (UN/DOT)

Overview: This rugged, durable bulk container is the same as the popular P291 with features added to earn it the UN/DOT certification for secure storage and transport of regulated and unregulated materials. The breakthrough fastening system securely attaches the lid to the container to ensure contents stay inside when flipped over. And, if an accident occurs during transport or with a forklift, the precious cargo remains inside and intact. Stacks when covered and nests when empty, fitted

with four, military-grade, side release buckles, and durable, waterproof, poly nylon straps.
UN/DOT certification number for 2019 – 11H2/Y/*USA/+AA7248/907/445

Dimensions Top, Outside: 45”x 45” Footprint: 44”x 44”
Overall Height: 33” covered
Capacity 27½ cubic feet
Load Capacity 807 lbs

INNOVATIVE CONTAINER

THE LINEN LOCKER

Overview: This new and innovative product was designed for optimum security and safety for collection and pick up of bulk items, both indoor and outdoor. Previously, team members and employees were using the 72P with lid and door causing some challenges. Items were exposed to the elements or removed altogether when the lid and door were not closed and locked properly. Also, multiple parties were sharing keys resulting in lost keys and compromised security. To address this problem, engineers added an accessible opening to make linen drop off easier and a rounded top to ensure snow and rain roll off easily to protect the contents of the container. The keyless drop off

makes it more convenient for multiple users and the optional lockable chute can be added in place of the opening, if desired. The addition of the secure door with the lockable hasp on the side guarantees greater security of items in the locker as well as easier and quicker pickup and drop off for the route drivers.

Dimensions 80” H x 47.5” W x 47.5” D
Capacity 54 cubic feet of volume below front opening
Load Capacity 1250 lbs.
Shipping Weight 280 lbs. for standard part on pallet
NOTE: Linen Locker fits 26 per standard trailer
